**Jersey City Public Schools (8 Schools)**

**#06080046, #06080048, #06080051, #06080052, #06080062, #06080064, #06080067, & #06080076**

The National Environmental Laboratory Accreditation Conference (NELAC) is a voluntary environmental laboratory accreditation association of State and Federal agencies. NELAC established and promoted a national accreditation program that provides a uniform set of standards for the generation of environmental data that are of known and defensible quality. The EPA Region 2 Laboratory is NELAC accredited. The Laboratory tests that are accredited have met all the requirements established under the NELAC Standards.

**Comment(s):**

As detailed in the QA project Plan, the Laboratory will analyze the first draw sample and, if that sample is 15 ug/L or above, the second draw sample will be analyzed. The Action Level for the program is 20 ug/L but a margin of analytical error was incorporated by using the 15 ug/L level.

Based on sample results from some of the schools, the Laboratory decided to analyze all of the second draw samples, regardless of the results of the first draw samples. The results for both the first draw and second draw samples are included in the laboratory report for each school. Please note that the results of all second draw samples below 15 ug/L were not reported on the school sample custody forms.

Methods - All first draw samples, and second draw samples that had results at or above 15 ug/L, were analyzed via EPA Method 200.8 (ICP/MS); all second draw samples that were below 15 ug/L were analyzed via EPA Method 200.7.

**Reporting Limit(s):**

The Laboratory was able to achieve the appropriate limits for each analyte requested. The Reporting Limit using EPA Method 200.8 was 1.0 ug/L; the Reporting Limit using EPA Method 200.7 was 8.0 ug/L

**Method(s):**

Lead Analysis, EPA Method 200.8 (SOP DW-8; ICP/MS Method)

Lead Analysis, EPA Method 200.7 (SOP DW-7; ICP/AES Method)
